

# Troubleshooting - alarms

Which alarm is shown on the screen? If you have already left the alarm screen you can go to Settings>Alarm list>Alarm history.

- First marker not found within 500 pulses
- File operation failed during teach
- Robot stuck too many times
- Unexpected PCB reset
- Water turned off due to stuck motors
- File operation failed during recipe edit
- PCB communication failure
- PCB communication watchdog triggered
- Hose reel stuck
- Water pressure too high
- Water pressure too low
- Ongoing wash aborted unexpectedly
- Homing needed
  
- Battery voltage low
- Over current detected
- Battery idle voltage low
- SELF\_TEST\_FAILED
  
- Marker missed
- Marker magnetic switch failure
  
- Motor] missing pulses in [a] direction
- Reel missing pulses
  
- Boom stuck in upward direction
- Boom stuck in downward direction
- Tower stuck in right direction
- Tower stuck in left direction
- Wheels stuck in backward direction
- Wheels stuck in forward direction
- Telescope stuck
- telescope\_stuck\_in\_inward\_direction
- Arm stuck in outward direction
- Arm stuck in inward direction
- Nozzle stuck in clockwise direction
- Nozzle stuck in counter-clockwise direction
  
- Missing zero position sensor for tower
- Missing zero position sensor for telescope
- Missing zero position sensor for arm
- Missing zero position sensor for nozzle
  
- Boom unexpected large position change detected
- Tower unexpected large position change detected
- Wheels unexpected large position change detected
- Telescope unexpected large position change detected

- [Arm unexpected large position change detected](#)
- [Nozzle unexpected large position change detected](#)
  
- [Boom no current detected](#)
- [Tower no current detected](#)
- [Wheels no current detected](#)
- [Telescope no current detected](#)
- [Arm no current detected](#)
- [Nozzle no current detected](#)
- [Reel no current detected](#)
  
- [Backup to secondary storage failed](#)
- [Remote backup preparation failed](#)
- [Remote backup communication error](#)
