Robot revisions

The first EVO Cleaner was installed 2017. Since then the robot has been updated according to the revision history below.

Models history

- 2018: 4G router enabling notifications, cloud backup, software upgrades and remote support
- 2019: pressure sensor enabling alarms for e.g. missing water pressure
- 2020: Wi-Fi capability
- 2021: narrow aisle package (corner wheels option, finer guidance wheel setting, more flexible marker sensor arm)
- 2023: new display, handle bars and wheel hubs
- 2024: new hose reel motor
- 2025: AGM battery as standard
